EXPERIENCE

CDygert Solutions, LLC

LIBRARY CONSULTANT & PRINCIPAL

1/2017 to present

CDygert Solutions consulting service provides expertise in the areas of strategic planning, project development and management, organizational change, workflow analysis, team building, consortia development, and negotiation strategies for the large-scale acquisition of library resources. We believe that the best results are achieved through a collaborative approach, and we bring that spirit to all our work.

RECENT AND CURRENT PROJECTS

Client: Cummer Museum Library & Gardens

Project: Library Assessment & Recommendations

Date: October 2019 – February 2020

Project Description: CDygert Solutions assessed the Cummer Museum Library and made recommendations for its reimagining, including the development of a collection development policy, a comprehensive weeding project, recommendations for online content, and modifications to library space.

Client: Independent Colleges and Universities of Florida (ICUF) Libraries Group

Project: Negotiate and Manage Statewide E-journal Packages

Date: June 2017 – current

Project Description: CDygert Solutions negotiates and manages e-journal packages from Cambridge University Press, Emerald Publishing, Oxford University Press, Taylor & Francis, and Wiley on behalf of the ICUF Libraries Group.

Client: GALILEO Library Consortium

Project: Statewide E-Journal Package Exploration and Contract Negotiation

Date: October 2018- current

Project Description: CDygert Solutions has been engaged by the library consortium GALILEO to explore the feasibility of establishing STEM e-journal packages, and then negotiating those contracts on their behalf. In 2019 CDygert Solutions negotiated a statewide contract with the publisher Elsevier for GALILEO and is in the process of exploring opportunities for working with additional publishers in 2020.

Client: California State University (CSU) System, Council of Library Deans

Project: Review of the CSU E-Resources Purchasing Program

Date: June 2019-September 2019

Project Description: CDygart Solutions conducted a 360° analysis of CSU's centralized licensing program valued at approximately \$20 million. Methodology included surveys, interviews, a pricing analysis and documentation review. The outcome of the project was a report that made multiple recommendations to the CSU on how to improve their processes.

Client: Florida Department of State, Division of Library and Information Services

Project: Digital Initiatives Program Review and Development

Date: November 2017 – July 2018

Project Description: Awarded to CDygart Solutions through a competitive RFP process, this multi-phase project provided an evaluation of DLIS's current Strategic Plan for their Statewide Digital Initiative, an analysis of DLIS's own digitization efforts, and a recommendation for a statewide Digital Repository Platform. Outcomes of the project include the practical and actionable [Florida Statewide Digital Initiative Implementation Plan, 2018-2020](#) and [Recommendation for a Statewide Digital Platform](#).

Client: Independent Colleges and Universities of Florida (ICUF) Libraries Group

Project: Consortium Development Exploration

Date: September 2017 –

Project Description: In 2017 CDygart Solutions provided an evaluation of and recommendations for transforming the volunteer ICUF Libraries Group into a formal, legally established library consortium. CDygart Solutions continues to work with the ICUF Libraries Group to develop strategies for their future.

GRANTS

Curriculum Development Support Award AU2001-2. Awarded by the American University Senate Faculty Development Committee, April 2001. This \$3960 grant provided the balance of the \$10,000 limit for reward of the CDS award. It supported the continuing development of a local "Access catalog" to organize scholarly Web-based resources for our user community.

Curriculum Development Support Award AU2000-1. Awarded by the American University Senate

Faculty Development Committee, May 2000. This \$5999 grant supported the development of a local “Access catalog” to organize scholarly Web-based resources for our user community.

2000 National Leadership Grant, Institute of Museum and Library Services, submitted March 1, 2000. With substantial revision due to developments in the field, this research and demonstration grant proposal was re-submitted to the Institute. While not ultimately funded, this grant proposal was generally well received by reviewers, and remained under consideration through the final review tier.

Humanities Council of Washington, DC, Quick Response Grant, \$1,500 awarded December 1, 1998, in support of the exhibit project “Keeping the Word: Libraries Then and Now”. The Humanities Council of Washington, DC is a nonprofit corporation promoting public humanities programs in the District of Columbia, with funding from the National Endowment for the Humanities.

1999 National Leadership Grant, Institute of Museum and Library Services, submitted March 19, 1999. This research and demonstration grant proposal requests \$96,630 in support of the development of an access catalog for the collection and organization of Internet based scholarly resources. While not ultimately funded, this grant proposal was generally well received by reviewers, and remained under consideration through the final review tier.

SELECTED DIGITAL LIBRARY INITIATIVES

Library Blackboard Site: Integrating Virtual Library Resources into Blackboard

The need to integrate library resources with Course Management Systems (CMS) has become a major issue in the higher education/information technology intersect. Universities are investing heavily in both, yet the two remain separate, usually managed by different administrative units and belonging to different cultures within the institution. In 2005 I assembled a project team at AU to develop a Blackboard Library Site that would help bridge that gap. The team included members both from the Library and AU’s Center for Teaching Excellence (CTE), which manages Blackboard, our CMS of choice. Over the summer we developed a Blackboard site for faculty that both provides information on the various resources – from scholarly articles and streaming audio and video to online chat sessions with reference librarians – available from the university library. The site also provides copyright resources and tips on universal design.

ARC: American University Research Commons

ARC is American University’s institutional repository. ARC is part of a shared implementation of the DSpace software by the Washington Research Library Consortium (WRLC). As the lead for this project at American University, I developed policies and procedures for building collections in ARC, and worked with University Counsel to craft submission licenses. As a member of the WRLC DSpace Working Group, I evaluated the DSpace submission process and interface for use-ability. ARC may be viewed online at <http://dspace.wrlc.org/dspace/handle/1961/175>.

Drew Pearson Washington Merry-go-round Digitization Project

American University Library’s Special Collections Unit holds the complete collection of journalist Drew Pearson (1897-1969) Washington Merry-go-round newspaper column. Pearson was one of the most successful journalists of his day and is often credited as being the father of the “muck-raking” style of reporting. I served as project lead for the digitization of this

collection. I researched the collection's copyright status at the US Copyright Offices in the Library of Congress, developed the digitization plan and metadata guidelines with the Digital Collections Production Center staff at the Washington Research Library Consortium, and worked with colleagues at American University Library to produce a Pearson biography, bibliography, and other information for the collection's web site. This collection may be viewed online at <http://www.aladin.wrlc.org/gsd/collect/pearson/pearson.shtml>.

EXHIBITS

"Reaching Back for the Digital Future" mounted at American University Library, April 2004. This exhibit was a collective effort by the library's Digitization Team. My contribution consisted of drafting an exhibit layout and a majority of the exhibit text. The exhibit profiled the library's digitization initiatives and featured the digitization project for the newspaper columns of journalist Drew Pearson.

"A Fistful of Dollars" mounted at American University Library, Fall, 2002. Co-developed with Stacey Marien, this exhibit highlighted the cost of providing access to content in electronic formats.

"Keeping the Word: Libraries Then & Now" mounted at American University Library, January 19-March 4, 1999, April 19-May 17, 1999; George Washington University, Washington DC, March 8-April 16, 1999; July 1-August 30, 1999; Gallaudet University, Washington, DC, September 1-September 30, 1999, University of the District of Columbia, October 1-November 5, 1999; Marymount University, Arlington, VA, November 8-December 17, 1999; and for the Online Cooperative Library Center's annual Users Group Council in Dublin, Ohio, May 2001.

The exhibit illustrates how digital technologies are producing revolutionary changes in the way libraries organize and provide access to information, as well as the challenges they pose to preserving that knowledge. The exhibit design utilizes state-of-the-art exhibit structure technology, with graphic design provided Mediastudio of Falls Church, VA. The exhibit is interactive, with a networked computer workstation and a TV/VCR unit that continuously plays the video recording "Into the Future: On the Preservation of Knowledge in the Electronic Age" by Terry Sanders.
